

"Carbon Offset Man" will keep the climate of Koenji!

Oh no! Koenji is in big trouble!

No problem!!

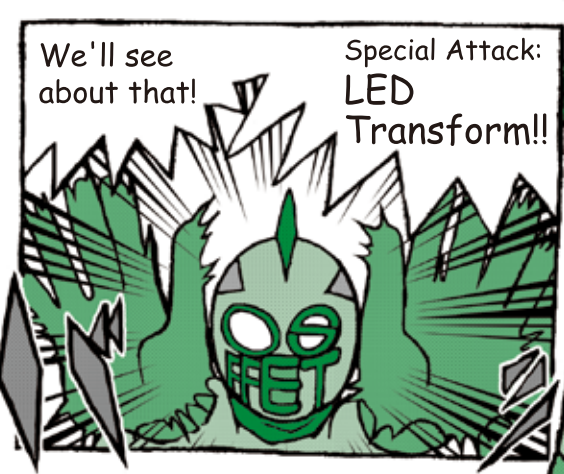

Who in the heck are you?

I'm Environment Mask Carbon Offset Man. Pleased to meet you!

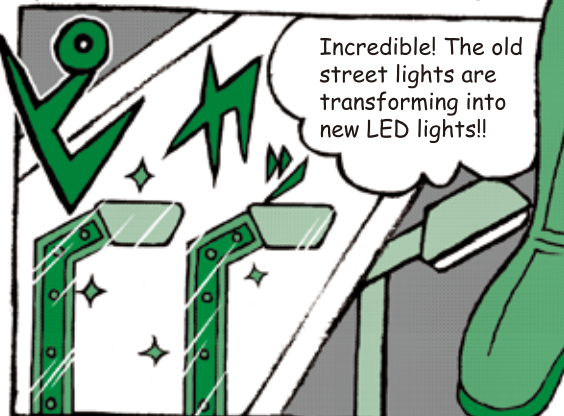

It makes no difference who you are!! I've absorbed so much CO₂ from these streetlights that I'm now unbeatable!

We'll see about that!

Special Attack: LED Transform!!

Incredible! The old street lights are transforming into new LED lights!!

Ahh... My power... The CO₂ emissions are getting weaker!

Ha ha ha... LED lights can reduce CO₂ by an overwhelming amount compared with conventional lighting!

You have defeated me, Carbon Offset Man!

Offset Complete!!

This is how the climate of Koenji was protected, and how we avoided global warming caused by CO₂.

Good bye

Thank you
